

Ukraine's Climate Policy Goals defined by the Law of Ukraine No. 991-IX, Article 4, 08.10.2024

ACHIEVING CLIMATE NEUTRALITY BY 2050

This involves mitigating the effects of climate change, adapting to its impacts, promoting low-carbon and sustainable development, and ensuring Ukraine's environmental, food, and energy security.

MID-TERM GOALS*

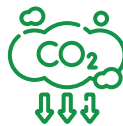

Reducing greenhouse gas emissions and increasing absorption across various sectors, including industry, transport, energy, agriculture, and forestry

Increasing the share of renewable energy and alternative fuels in Ukraine's energy balance

Lowering the energy intensity of GDP and reducing emissions per unit of GDP

Developing low-carbon and environmentally friendly technologies and infrastructure, as well as nature-based solutions

Strengthening the adaptive capacity and resilience of socioeconomic and environmental systems

Enhancing greenhouse gas removal through nature-based approaches.

LONG-TERM GOALS

Achieve **climate neutrality** through a **socially just** and **economically efficient** shift to **low-carbon development**, supporting the **Paris Agreement** target to limit global warming to:

- Well below 2°C,
- With efforts to cap at 1.5°C above pre-industrial levels.

Enhancing resilience and reducing risks, including health-related ones, associated with climate change by implementing adaptation measures.

Supporting low-carbon and sustainable development.

Ensuring environmental, food, and energy security.

THE FOLLOWING DOCUMENTS DEFINE PATHWAYS

Documents	Period	Revision
Long-Term Low Emission Development Strategy	• 10-year period	• Every 5 years
National Energy and Climate Plan	• 10-year period	• Every 5 years
Nationally Determined Contributions	• 10-year period	• Every 5 years
Climate Change Adaptation Strategy	• 10-year period	• Every 5 years
Sectoral GHG Mitigation Programs	• 5-year period	• N/A
Sectoral Adaptation Programs	• 5-year period	• N/A
Regional/Local GHG Mitigation Plans	• 5-year period	• N/A
Regional/Local Adaptation Strategies	• 5-year period	• N/A

All mitigation and adaptation measures must be included in:

- Regional development strategies
- Community development strategies & action plans
- Environmental protection programs
- Other local planning documents

*Defined by Ukraine's Long-Term Low Emission Development Strategy
